NOVELTIES

of my own raising for 1903—1904.

The extremely favorable reception and the extraordinary far dissemination of my two Aster-novelties have induced me to cultivate themselves on a larger scale, so that I hope to be able to justify every demands.

From a repeated exact description of these two novelties I have looked off, for I am convinced that they are now sufficiently known. In all Horticultural-papers these novelties have been praised as two of the most excellent introductions.

A First Class Certificate of merit has been awarded to both novelties by the Jury of the Society for encouragement of Horticulture in the Royal Prussian States at their meeting on 4. September 1902.

Allowance to the trade $33\frac{1}{3}\%$.

Some valuable introductions of last year.

Without any reduction.

Erfordia-Aster, rose.

Particular, very recommendable kind, whose flowers group very regular, loose and graceful round the chief-stem. High ca. 16—18 inches.

100 packets 18s., 10 packets 2s., 1 packet 3d.

Ostrichfeather-Aster, malmaisonrose.

A charming, quite apart colouring; white with delicate lilacrose hue, exat like the colour of the Malmaison-Rose. For florist purposes extreme valuable.

100 packets 12s., 10 packets 1s. 6d., 1 packet 3d.

Paeony-Perfection-Aster „Amethyst“, white, later amethystblue.

The flowers at first white, take later a delicate clear, amethystblue colour, which is still heightened by delicate atlasgleam.

The Petals being first of white colour, change afterwards to a nice pure amethyst blue.

100 packets 12s., 10 packets 1s. 6d., 1 packet 3d.

Calliopsis hybrida superba.

Forms regularly round bushes of 12 to 15 inches in hight of excellent rich flowering and splendid colours of all shadings, canary yellow as well as bloodred.
